

Vision Collection

NORPE HAS ALREADY BEEN SYNONYMOUS WITH QUALITY AND PIONEERING ENGINEERING FOR OVER 55 YEARS. NORPE'S INNOVATION IS ONCE AGAIN THE FORERUNNER FOR THE ENTIRE REFRIGERATION INDUSTRY.

FAMILIARIZE YOURSELF WITH NORPE'S STREAMLINED AND INDIVIDUAL PRODUCT RANGE. NOW YOU CAN PLAN YOUR REFRIGERATION SOLUTIONS ACCORDING TO THE INDIVIDUAL NEEDS OF YOUR BUSINESS LIKE NEVER BEFORE. GIVE VISIBILITY TO YOUR BRAND!

New functionality

The new Vision Collection represents the perfection of refrigeration technology. An advanced feature in our new collection is the modulated platform structure to increase the productivity of our cabinets.

Functionality is the result of continuous product development and can be seen in the carefully honed details. All of the higher cabinets can be lined up with each other. The uniformity of the cabinets is further enhanced by the continuous canopy structure. Removable suction grids on the multidecks for effortless cleaning of the air suction channels.

NEW ACCESSORIES:

- New ticket strip holder
- New pizza shelves to MD30/43 and SV30/43 cabinets
- New corner cover
- Mix a' Meal concept
 - 6250 mm modules
 - Podium 6250 and 1250 mm
 - Shelves with plastic bowls

New visual design

The Vision Collection has a new stylishness throughout. The more comprehensive utilization of glass surfaces and higher glass doors give a lightness to the general appearance of the cabinets - from every angle. A new visual feature of the higher cabinets is the cut canopy. The advantage of this is the lightweight general appearance and the ease of lining up the higher cabinets. The curved shape of the basin's end panels helps to soften the otherwise massive islands by giving the lower edge a sense of animation and movement.

Caring for the Future

Green values, such as energy consumption and the recyclability of parts, have always played a very important role in our operations. Most of the raw material waste is recycled. Environmental values have always been, and will increasingly be, a question of honour to Norpe. Our product development is constantly working towards producing more and more environmentally friendly products so that our clients can increase their own sustainable development and decrease their environmental impact. Highly efficient low-energy fans can be chosen as an option on all Norpe supermarket cabinets. Wider air channels for improved air circulation and

optimized suction grids. Evaporators and control systems for different types of coolants are available for our Vision Collection range. For further information please contact us. We would be pleased to tell you about other available options.

New individuality

The Vision Collection is ideal for your business and clients. Our excellent new cover plate range makes customizing possible in a new and easy way. Also, different forms are available, so only creativity is the limit!

What is your favourite cover plate model?

Arc (Standard)

ARC

In addition to the Standard model you can choose your favourite from the Premium ornaments or design your own Deluxe version.
